

OUT OF QUARANTINE AT LAST

THE NORMANNA'S RETURNED PASSENGERS COME TO TOWN.

Mostly in High Spirits at Getting Away—One More Shipboard with the Cepheus to Quarantine and Also at the Harbor Pier.

QUARANTINE, FIRE ISLAND, Sept. 16.—An early start made by the Normanna's passengers this morning and their long detention ended in general jollity, cheers, music and good feeling. After the concert and meeting in the hotel last evening many of the passengers visited the camp of the Thirteenth Regiment west of the hotel, where the soldiers gave an entertainment, which lasted long after taps. The various amusements kept the hotel premises in a lively, wide-awake condition until late, but promptly at 4 o'clock the passengers began turning out in the gray dawn in response to a high calling song. By 5 o'clock the rising tide had filled the room with hungry breakfasters. Soon after the steamer Rattle took off its first load to the Cepheus in the channel, and before 8 o'clock the third and last load had left the landing. Dr. Seward and Andrews went in charge of the passengers to the Cepheus. It was 10 o'clock when the steamer got underway, with Pilot Wicks on the bridge. The passengers gave a cheer for the Surf Hotel.

There was a strong flood tide running, and as the Cepheus attempted to make the north turn in the narrow channel off Oak Island lighthouse, she had to make the bar, the tide swept her on a sand point running up from Oak Island. A news reporter went off to her in a catboat, and found the passengers in a jocular rather than a discouraged mood.

"I've won my bet," one passenger called out. "I knew this Cepheus could not get to New York without some accident."

As soon as the Rattle returned from her last trip to the Cepheus she was loaded by about fifty Normanna's, who had decided to take a chance on Babylon quarantine and make the trip to New York by the Rattle. Most of these were first-class passengers who live in New York City. Dr. Seward, who was in charge of the quarantine, said that the Rattle brought no infected persons, and that the passengers were in good health. Dr. Seward had given them clean bills of health. Many of the Normanna's passengers were thoroughbred New Yorkers, and the city that they would not be received as guests in any of the New York first-class hotels. They made their way to the Rattle, where a committee of the city expressing entire willingness to accommodate them. This was signed by the Mayor, Alder, St. John, Hoffman, Holland, Altamora, St. James, Coleman, Imperial, Metropole, St. Cloud, Savor, and Winthrop.

There has been riot and riot in the kitchen and dining rooms of the Surf Hotel since the Cepheus arrived Sunday night. The trouble was started by a raid on the wine cellar, which resulted in the seizure of champagne in the servants' quarters. The trouble culminated in a riot in the kitchen, in general mutiny, and Manager Wall after breakfast ordered the whole force to pack up and leave the hotel. The Rattle, however, was a dispensation of Providence in their behalf to compensate them for their hard lot in the Cepheus.

It is reported here to-night that Gov. Flower will arrive to-morrow on a tour of inspection.

GEN. CLARKSON RE-ELECTED.

HE CONTINUES PRESIDENT OF THE REPUBLICAN LEAGUE OF CLUBS.

Stim Attendance at the Second Day's Session of the Convention—Secretary Humphrey and Treasurer Lonsbury Re-elected—Meeting of the Women's Association and of the College League—White-law Held Addresses a Mass Meeting.

BUFFALO, Sept. 16.—The morning session of the Republican League Convention was supposed to open at 10 A. M., but it was nearer 11 when the President's gavel fell. In an adjoining hall at the same time Mrs. J. Ellen Foster was presiding over a meeting of women, and there was a very large attendance. Foster opened the meeting with some preliminary remarks describing the work the women were expected to do in the campaign. She said that it was an acknowledged fact that the influence of women was great, and why should it not be as great in politics, in pure politics, as in other pure politics. The relation of women to the campaign would be to purify them, to make the issues moral ones, and to educate at least their sons, the voters, to vote for their country's welfare, and not simply in a blind way for a party. She said the object of the association was to encourage women to study Republican doctrine and to acquire the habit of action and to help the election of Republican candidates. She closed by urging the women of Buffalo to organize, so as to aid in encouraging the men. Many clubs, she said, were forming in the country, and their membership is largely increasing. The first New York State woman's club was organized in Glens Falls, and it has since been followed by many others. Mrs. Mary Stuart Collins of Michigan, who spoke enthusiastically of the work in that State; Mrs. Frances W. Howard of Washington, who detailed the work of the National Women's League organization; Mrs. Logan of Boston; Mrs. Thomas W. Clark of New York; and Mrs. John M. Thurston of Nebraska.

There were hardly 100 delegates present when the League Convention opened, many being at the women's meeting in the side hall. The Committee on Longue Work reported that the League had demonstrated that its work was of great importance. It had acted as the champion of education, pressed by the States for educational purposes. Funds should be used to promote the organizing of clubs for the promotion of education. The work of the League will be to secure its greatest triumph when there is a club in every town and in the furthering of the work of the party. The Committee on Time and Place reported that the League had demonstrated that its work was of great importance. It had acted as the champion of education, pressed by the States for educational purposes. Funds should be used to promote the organizing of clubs for the promotion of education. The work of the League will be to secure its greatest triumph when there is a club in every town and in the furthering of the work of the party.

THE VINTAGE OF '92.

A Small Yield of Champagne, Burgundy and Bordeaux, but the Quality is Good.

LONDON, Sept. 16.—The following appeared in the *Times* (Paris) edition:

"The year 1892 will not rank as a good year. The vintage promises to be exceptionally small, but generally speaking the quality will be good. The extremes of heat and cold rather than disease have caused a diminution in the crop. The scorching of grapes in the claret districts has been a serious loss. The quality, from Bordeaux, is reported to be good. The vintage is entirely free from mildew. From Rheims it is reported that champagne will be scarce, but of high quality. A similar report comes from Burgundy. The yield of nearly all the wine of the vintage will be only one-half of last year's. It will be of excellent quality if the fine weather continues."

Our correspondent expects a rise in the price of wine. The weather of August, shortening the crop. The Portuguese vintage will be earlier than last year's, and the quality will be good. The yield will not exceed one-third of the average, but the quality will be good.

ENGLISH PRAISE OF GOV. FLOWER.

His Way of Dealing with the Fire Islanders Delights the Downing Street.

LONDON, Sept. 16.—The *Saturday Review* publishes a long article on "The Intervention of Gov. Flower." "The only things in connection with the Fire Island that we take interest in," says the editor, "are the intervention of Judge Barnard and the final action of Gov. Flower. The selfishness and cowardice of the Fire Islanders are very common human failings. It is by no means certain that an English man under similar circumstances would have behaved better. It is natural to believe that Judge Barnard acted from pure partisanship, thereby indicating a danger upon which the United States may suffer greatly, and from which we are not certain that we should remain free in the event of home rule."

As a set-off to Judge Barnard's behavior, Gov. Flower's action, words, and example might well have been expected from a man of his high position. It is natural to believe that a competent hand, but the weighty scene is a most striking one. The duty of the modern governing man in a nutshell, I don't care a damn for votes! I will put down the wickedness of the people, nearly all the law of all the prophets. As long as the United States produce Gov. Flower, they may escape suffering from their Judge Barnards."

Baking Powder

ABSOLUTELY PURE

"The Royal Baking Powder is superior to any other powder which I have examined; a baking powder unequalled for purity, strength and wholesomeness."

—WILLIS G. TUCKER, M. D., Ph. D., Analyst.

LONDON, Sept. 16.—The following appeared in the *Times* (Paris) edition:

"The year 1892 will not rank as a good year. The vintage promises to be exceptionally small, but generally speaking the quality will be good. The extremes of heat and cold rather than disease have caused a diminution in the crop. The scorching of grapes in the claret districts has been a serious loss. The quality, from Bordeaux, is reported to be good. The vintage is entirely free from mildew. From Rheims it is reported that champagne will be scarce, but of high quality. A similar report comes from Burgundy. The yield of nearly all the wine of the vintage will be only one-half of last year's. It will be of excellent quality if the fine weather continues."

Our correspondent expects a rise in the price of wine. The weather of August, shortening the crop. The Portuguese vintage will be earlier than last year's, and the quality will be good. The yield will not exceed one-third of the average, but the quality will be good.

THE VINTAGE OF '92.

A Small Yield of Champagne, Burgundy and Bordeaux, but the Quality is Good.
